

## Pneumatic (Air Powered) Tools

The PAC APT line of pneumatic tools is designed to take the effort out of applying plastic strapping by performing all operations with the touch of a button. The APT line uses pneumatics to tension, weld, and cut the strap, and the high performance air motors apply enough tension to pull the strap into its working range. The result is improved strapping efficiency, uniform tensioning, better welds, and reduced operator fatigue. The PAC line offers a full range of tools for both polypropylene, and high strength polyester. All APT tools are backed by a robust warranty, and our own service department.

These tools are proven for durability, reliability, and performance.

### APT450

#### TECHNICAL SPECIFICATIONS

Applications:	Regular duty, flat packages, PP and PET
Weight:	11lbs. (4.9 kg.)
Seal Joint:	Friction weld, 80% joint efficiency
Tension Capability:	400 lbs. (1800 N)
Strap Sizes:	3/8 – 3/4" wide, up to .040" thick (9 – 19mm up to 1.0mm)
Air Requirements:	78 – 92 psi (5.5 – 6.5 bar)
Air Connection:	1/4" NPT, minimum 3/8" hose, with filter regulator

APT450

### APT900

#### TECHNICAL SPECIFICATIONS

Applications:	Heavy duty, flat packages, PP and PET
Weight:	11.5 lbs. (5.2 kg.)
Seal Joint:	Friction weld, 80% joint efficiency
Tension Capability:	750 lbs. (3500 N)
Strap Sizes:	1/2 – 3/4" wide, up to .050" thick (12 – 19mm up to 1.27mm)
Air Requirements:	78 – 92 psi (5.5 – 6.5 bar)
Air Connection:	1/4" NPT, minimum 3/8" hose, with filter regulator

APT900

### APT1100

#### TECHNICAL SPECIFICATIONS

Applications:	Heavy duty, high tension, flat packages, PET
Weight:	11.6 lbs. (5.3 kg.)
Seal Joint:	Friction weld, 80% joint efficiency
Tension Capability:	950 lbs. (4400 N)
Strap Sizes:	5/8 – 3/4" wide, up to .050" thick (16 – 19mm up to 1.27mm)
Air Requirements:	78 – 92 psi (5.5 – 6.5 bar)
Air Connection:	1/4" NPT, minimum 3/8" hose, with filter regulator

APT1100

## Pneumatic Tool Accessories

**Tool Balancers** – Tool balancers are used to suspend strapping tools from ceilings or brackets. When used effectively, they reduce working weight of tools.

- TB13- For tools weighing between 6 and 13 pounds
- TB18- For tools weighing between 11 and 18 pounds
- TB24- For tools weighing between 18 and 24 pounds

**Filter Regulators** – Filter regulators control airflow to pneumatic tools. They provide consistent, clean, lubricated and dry air to your tool for trouble free operation.

**Round Bundle Base Kit** – Available for both the APT450 and the APT900, the optional base kit will allow the tool to be used on a round bundle of at least 20" in diameter.
