

V-MAX

Economy priced, bottom seal arch machine...

Designed for low to moderate volume strapping applications, the V-MAX is our lowest priced arch machine, and may be the lowest cost, quality arch strapper available in the U.S. market. The very competitive price of the V-MAX does not come at the expense of quality. The strapping head is the same head that we use on our Auto Pac 300. In order to lower the cost, we have eliminated certain features that may not be needed on less demanding applications. In addition, the V-MAX is also fully supported with a complete parts inventory, and unlimited, free telephone support from our service department. All V-MAX arch machines also come standard with the following features:

- **Lubrication Free Strapping Head**

The strapping head never needs to be lubricated.

- **Three Activation Modes**

All V-MAX units can be operated manually, with a foot switch, or with a ball activated table mounted switch.

- **Six Months Parts Warranty**
